[REDACTED] 02010.pdf 242k

At the bottom of this document shows two emails I sent to Trooper [REDACTED] [REDACTED] who is [REDACTED] [REDACTED]. These were sent to him during the time Trooper [REDACTED] was sending the criminal they referred to as 'Tippy' into our home in Rockland. This is the man they later had file a false restraining order on me under another name, Robert Darcy. Initially this man and our landlord, Jessica Nassif, who is Trooper [REDACTED] [REDACTED] friend, said his name was Richard. I even have texts from her claiming his name is Richard.

I asked [REDACTED] [REDACTED] for help and I even called America's Most Wanted on him since he fit a description of a wanted criminal. I found a second email I had sent to him and Rockland PD which is included below. I keep sending this information to prove the truth of why and how long this has been going on, and to show the connections with the obsessed trooper I dated, and the stalking trooper I was married to. Below you will see the email to [REDACTED] who worked for VFAS and claimed he couldn't find out who this criminal was, but his boss and friend who also worked at VFAS had a tent set up right across from me. That's the guy wearing his hat backwards.

[REDACTED]

Subject: Fw: MSP VFAS

Sorry, I meant to include the photo of the VFAS member who had a tent set up across the street from me. It was manned 24-7 and even on weekends which VFAS does not work. This was [REDACTED] unit at the time and it was set up during 2010 when their criminal informant broke into my home and car daily.

This was being done for Bob Long, who they all work for on the side. I've never been violent or a fugitive but they were trying to help [REDACTED] get his child support canceled.

This VFAS member (in the tent) was visited by the criminal 'Tippy's' friends. Tippy is the one those vile ramblings of Trooper [REDACTED] were meant for and they instructed him to get a false restraining order on me. Tippy is the one they told to "poison, weaken, and sicken the public".

I also have photos of the pop up tent while it was across the street and the home they moved it to after I caught them. I believe he is Mark Horgan, [REDACTED] boss at the time. The photos of the tent are in my safety dep box so Trooper [REDACTED] can't have anyone else steal my evidence. This is one man who was manning the tent.

The second email I sent to [REDACTED] was after an Asian woman went to visit the 'Tippy' guy. Since he didn't open his door, I went out to talk with her and question who he was. I have a photo of this Asian woman on my Facebook and I found her photo on one of Atty Kathleen Morrisseys fake social networking accounts where all these cops are her friends. I also submitted this Asian

womans license plate at the time. (I still have it in my safety dep box). This woman had no idea what this guys name was and knew nothing about him or his live in. I realized this from questioning her, so I believe she was sent to either bring him something or get him a message, because she was not friends with him as she claimed.

A short while after I sent the information on her, the cops were online and wrote "Don't worry, I took care of the Asians plate". I don't know what he meant by that but they obviously did something to protect her identity.

The second email I sent to [REDACTED] is placed below and he also ignored this one as did Rockland PD.

Subject: MSP VFAS

Below is an email I sent [REDACTED] Trooper [REDACTED] during 2010 to report the criminal both my daughter and I saw trying to enter our place (Trooper [REDACTED] buddy). You'd think he would have helped his own minor child but he and Rockland PD ignored us. I found out he lied about this too, claiming he couldn't find any information on this guy.

A VFAS (violent fugitive) trooper unable to find out who this guy was who apparently had a warrant? That's funny, especially since this criminals friends went over to talk to the VFAS troopers who were manning the tent they set up. (for PI BOB LONG). I believe it was Trooper Mark Horgan who was [REDACTED] friend and his boss at the time.

The email is below, along with with the criminals (Tippy) license plate at the time. I believe his live in womans name was Nancy Silva and is a nurses asst for HHS. Once I found her name the two of them couldn't have moved out of that duplex fast enough.

This criminal did horrible things to both me and my minor daughter, is this how MSP works? I'd say so, but your job is not to commit crimes against citizens! You should know this.

Bcc:

Hi,

They just had a visitor next door who I was speaking with as she was standing there for a while. I asked her who she was looking for since she claimed she was "friends" with them. She she gave a last name of LUNZ? I asked her the mans first name and she said Chris but then said "I don't know". This is what I mean about this guy next door, something up. Im sorry to bother you but I am very concerned as I'm sure you are. Perhaps I should have sent this to your Captain? I apologize, I wasn't sure where exactly to send it.

Bcc:

Since you work in the MSP Fugitive Unit and of course are concerned about your daughters health and welfare I thought I'd send you this information so that either you or Rockland Police detectives could look into for me.

I am concerned about the man who lives in the same duplex as I do at 510 Webster St in Rockland. He claims his name is Richard Darc and he claims to be 32 years old yet he appears much older than that. The license plate on the car he drives is 263-CZ9

I was also speaking with a neighbor who claims he may have a warrant on him and that he is from out of state. My concern is that I saw him near my back door one night in July when my car wasn't here and I yelled at him to get out. He may have thought I wasn't home. I also noticed in the next month that some "minor" items had been missing from my home. I say minor because one item was a page of my emails and passwords to access those accounts. My passwords were then changed on me. This happened on August 21, 2010

I didn't know who it was at first until I saw him. I didn't report it because at that point I hadn't heard anything about him and he claimed to be "cleaning the yard". I did always sense something was up with him though and he has admitted to knowing how to do illegal things which he now denies ever saying.

I have also seen him looking in the windows of my finished basement and I need to be sure he isn't a sex offender or some other type of wanted criminal. My landlord even lied about him stating she doesn't know him and he's a "stranger" to her, yet he's been here a while and gets discounted rent from her for the "jobs" he does. She lied about other things as well but I won't get into them now.

I was told by a professional person that this man lived in my place prior to me moving in here and his name may really be Jose Salinas or close to that. I am concerned about him and would like to know his true identity and that it is safe to live next to him. I know it would put your mind at ease to know Ashley is living in a safe place as well. I believe he was already reported in the past yet nothing was done? I am unable to confirm this ...

If you are unable to do a check on this guy please forward it to someone who can. If not I will contact the Attorney General's office for help.

Thanks, [REDACTED] [REDACTED]

The good MA cop wrote about the MA police again!

“How does an employer keep an employee who cannot perform the most basic of task in his job description? This is a typical example of why MA has failed to make progress. People are hired and kept on their jobs not on the basis of merit and performance but how close they are to the man at the top. Merit and performance are sacrificed on the altar of cronyism and nepotism”.

This document has been updated and involves the Massachusetts State Police who I personally know that are having their criminal rats commit these crimes against me in NH for over six years now. I didn't want this confused with the NH State Police who always act within the law and always exhibit professionalism and class.

The attached document explains information about a new chemical tracking gel the MA troopers are placing on citizens. It's very likely this substance is highly dangerous to the public's health and this is explained inside. I asked the MSP Colonel Gilpin for the name of this substance in order to submit it to my physicians and Dana Farber Cancer Hospital but she has failed to respond again.

The troopers are placing this substance in items which are directly entering a person's bloodstream but they are also hiding what this substance is.

This is in the public's interest due to the harmful effects on the citizens and I will be making this public due to the lack of response. Trooper [REDACTED] has again had someone enter my vehicle during the last week and he sprayed this substance all over my new blanket. I have cut the blanket in order to retain samples of this substance.

Governor Bakers Office also ignored my complaints and letters on this.

Please see document and you will read these MA police discussing the chemical substance and it's very clear they are aware of it's harmful effects. [REDACTED]

PDF is attached and below is Google doc.

MSPCrimesTrackingLiquid (1).pdf 3.9M

This document has been edited on January 18th of 2019 due to a lack of response by the MSP Colonel or Governor Baker when asked to identify this tracking fluid the police are using. The ingredients and chemicals need to be identified to ascertain what has been entering my bloodstream and if these chemicals are responsible for my current medical conditions. Please do NOT expect MSP to investigate themselves on this because they won't, and besides, they are tied to the state labs and had many friends employed at the Hinton Drug Lab including the director Julianne Nassif and Annie Dookhan. (See Hinton Drug Lab Scandal).

They were communicating on Craigslist with the drug chemists during 2010 and this is an ethics violation. Nassif was later fired but they got her a job doing the same in NH. If they investigate themselves it will be another cover up...of many.

Dear Colonel,

November 14, 2018

Due to being diagnosed with several new medical conditions including lung cancer, I am formally requesting information on what this tracking fluid is that your troopers have been placing in my vehicle, my makeup, makeup applicators, my food containers and storage bags, my clothing, in my shampoo, and on the inside covers of my jarred food.

If you don't believe they've been placing in my shampoo and hair products, read below and you will see one of the cops from this group discussing this and how they will squirt the substance on people..

As you know, during the last few years I have sent you many photos showing this unknown substance which is used to track people with Trooper [REDACTED] [REDACTED] instructing many people to trespass my home and car to place it on my property for over ten years. (More photos are below)

My eyesight has deteriorated and I have unknown internal bleeding which they can't find yet. To add to this, they just found a mass on my lungs and Dana Farber has asked if I had been exposed to any chemicals or asbestos long term. I need to give him an answer as to what this substance is but MA law enforcement refuses to respond to me.

In order to track you the substance has to contain chemicals or some radioactive substance.

This substance is being placed on US citizens in order to track them and it's very likely harmful to their health. The troopers have been using me as their guinea pig to test new surveillance tactics which are most likely military grade, not approved, and something public needs to be aware of. They have plenty of connections to military and those employed by homeland security and have easy access to this.

I don't enjoy being tracked by those I shot down both romantically and sexually, and this includes [REDACTED] Trooper [REDACTED] along with both Troopers [REDACTED] and the married [REDACTED] [REDACTED] I've now found the 'smart water' was placed on a brand new top I just bought but it doesn't show on camera well. It's only visual by using ultraviolet black light which I have but it did not photograph well so I am not including the photo.

For those of you unaware, there are forensic tracking fluids out there which the state troopers who are obsessed with me have been placing on ALL of my property and inside my vehicles and food items for many years. This is due to my divorcing a trooper who has always stalked me, due to my reporting their crimes, their extramarital affairs, and reporting their corruption and apparent money laundering. (including ties to wealthy nightclub owners and construction co's)

I believe it's a military grade substance which is most likely not approved for use yet, but this group of MA troopers do not normally abide by the law and do as they please with the MSP Colonels looking the other way. They place it on all items I carry with me so they can track me all the time. This includes inside my eyelash curler so the substance enters my eyes when I use it, my toothbrush, my water and diet coke bottles, my makeup, food containers, shampoo, and all my clothing.

You can see photos of this below and you will read these cops discussing it towards the end of this document. I have submitted over thirty photos of this stuff which keeps being placed on my personal property as soon as I remove it and I've had to throw out clothing monthly.

I can't imagine this substance was made for human consumption and I'm certain there are no studies done on the long term effects it may have on a person when entering the human bloodstream. I know this because if it can be tracked it's harmful and not meant for human consumption.

Certain members of MSP feels they can do whatever they please regardless of whether it endangers someone's life or health.

They've placed this substance inside an object I place directly on my eyes daily and have done so for years.

If you claim it's harmless then you can send me the name of the substance and I'll find out for myself, but I need to bring this information to my physician at Dana Farber and others to determine its harmful side effects so I'd like this information as soon as possible. I will not trust any MSP investigation on this because they have a very bad track record of investigating themselves and a very good track record of cover ups.

They are still doing this to me on a daily basis while working for PI's on the side such as Bob Long (former trooper). It's the pi's and their military connections who are supplying the

substance. Today is Tuesday January 22 and I just found it placed on my new food containers, my jacket and all throughout my car again. This they did when I slept at the hotel .

There is a total disregard for a citizens health and extremely dangerous, but they continue even though I've complained about this to the Colonels, Governor's office, AG, and DOJ.

The DANA FARBER cancer specialist told me he is not so sure the mass on my lungs is cancer and he doesn't believe it is so more testing will be done. But inflammation of the lungs is many times caused by a cold, flu, or respiratory infection but I've had one small cold once in the last ten years so it's not that. I believe this substance is the cause and the reason the cancer specialist says it looks different than a typical lung mass and could be the cause for any kidney problems.

A few years ago I had LYME disease and thought my eyes were deteriorating due to the LYME. Since the antibiotics taken at the time cleared up my eye issue, I'd be willing to bet it's more of an infection than LYME. This eye issue had returned a few weeks after I stopped antibiotics and when I no longer had LYME, therefore, I assert I may have some type of eye infection due to this substance since the antibiotics cleared it in the past. I assert this infection is most likely due to this substance they've been placing on my make-up and the applicators for over eight years which has been entering my eyes daily.

They placed the tracking fluid under the small curved cushion of my eyelash curler. Therefore, when you place this curler on your lashes and squeeze it, the substance is pushed outside of this cushion and enters your eyes. This has been done by a trooper who I dated and ditched years ago and who has been stalking me since. You can see the liquid on the photo below.

I appreciate a response Colonel, if not, I'll have a physician or DC HHS look into it. Since this is in the interest of the public, and since MA law enforcement has ignored me and yet continues to place this fluid on me, I am going public with this and also bring it to the CDC and DC.

This document shows the daily harassment, crimes, and destruction of my property MA Trooper [REDACTED] [REDACTED] has been involved in and shows a couple of emails I've sent to law enforcement to investigate. I'm still waiting for a response. I've dealt with him and these crimes for over ten years and after I ended relations with him.

No wonder why I'm having kidney issues, it's probably been entering my bloodstream for all the years they've been doing this to me! Three separate medical facilities told me there is moderate blood in my urine. So far they have not found the cause.

I've now been told I have a mass on my lungs which they are testing further! (January 2019)

This is how obsessed they are with protecting the wealthy and corrupt I've reported! I believe they are testing and using some military grade chemicals, quantum dots, smartwater, nanochemicals to track me and I just found they have Ebay accounts using the lab names who create this tracking fluid.

The inside of the jar lid is the first photo shown below. You can see the gel like substance inside the cover of the peanut butter jar I had just opened and used one time. You will see the same liquid substance inside my eyelash curler and on the back neck area of my sweatshirts. The substance is shown on the top of the below photo of the peanut butter cover and it is NOT peanut butter.

One time they broke into my vehicle they broke the back to my laptop, but before doing so they placed many small globs of the gold tracking all over the keyboard. They broke and snapped the top of it off so I'd have to leave it open and taped to stay up as the fluid works best this way. Apparently this fluid has to be on the surface of an item such as a computer and the top sections of my car in order for it to work properly. (I can't afford to keep buying new laptops, this is my fourth).

. They also cut the wires to my dashcam so I couldn't record all of the people and local NH cops Trooper [REDACTED] sends to harass me while I'm in my vehicle. He is trying to intimidate me so I stop mailing complaints on him. Whether I'm eating, getting gas, on my laptop, or resting, over twenty local police approach my car and bang on my window to question me. The last one, Jaffrey PD, wanted to search my car because there was an unlit cig butt on the ground. I declined.

Even after I reported them to the new MSP Colonel over twenty times they continue to destroy and contaminate my property. They have mechanics who help them so they're able to tamper with anything in my vehicle. MSP makes false claims they're investigating me in NH yet they refuse to investigate their own crimes in the same state.

I also believe he is putting this in my shampoo and conditioner as my hair was hard after I washed and dried it. It continued that way until I replaced the old bottles of shampoo and conditioner and bought the same brand but new ones. You will read them discussing tracking people by placing it in their hair in a chat below.

My eyesight has deteriorated a great deal. Below you can see this tracking gel was placed under the rubber insert to my eyelash curler. This means when I place the eyelash curler on my eyelashes and press down, the liquid squeezes out from underneath the rubber piece and enters my eyes. This explains the feeling I've had of a substance in my eyes for a long while.

They have a copy of the key to my brand new car and this is how they enter it constantly. I have plenty photos of their destruction of this new vehicle and tracking substance which I've sent to the MA Governor and MSP many times. The substance is shown below under the small rubber insert of the eyelash curler. You can see it on the left side of the curler when I removed the rubber insert. There was a big glob of it there and a smaller glob next to it. I've since thrown it out but they do the same thing once I purchase new ones.

You may naively doubt a cop would behave in such a manner, but let's not forget Trooper [REDACTED] public posts he wrote to the criminal informant I shared a duplex with, the criminal who entered my home daily to destroy, steal, and place surveillance. He instructed him to "poison, weaken, and sicken the public", it was his "plot" as he called it.

If you don't believe me, the post is below and I've well proven who wrote it. If you think this post is bad, you should see the rest of them written by this group of dirty MA cops.

This particular trooper has been fixated on me for over ten years needs a psychological evaluation, but not by the doctors who evaluated him to get on MSP because they're in cahoots with them. This public post was posted on Craigslist and was written by a trooper. It's an instruction to the criminal to trespass my home to "poison and sicken the public" which he did.

Both me and my daughter caught him trying to enter our back door on two separate occasions and the local police wouldn't question him when I reported it. The Rockland PD knew he was doing so for the troopers and they wrote false reports instead.

The reason he posted a picture of a clubbed foot on the post is because the criminal I shared the duplex with has a clubbed foot, so the photo was to let him know the message was for him. They communicate only online when conniving their illegal activities and Craigslist is where they communicated with him, it's also where they cyber stalked me daily and hourly.

As you can see below, the cop wrote "The plot to poison, weaken, and sicken the public" which was me and my child who lived next to him in the same duplex. I've well proven who wrote this post and the many others which went along with it, including one where they instructed this criminal to file false charges on me. I can supply these as well.

So what is the “poison” he refers to when he wrote about “poisoning, weakening, and sickening the public” (me). Drugs, chemical tracking gel, or other? You can see them discussing the harmful effects of this substance in their chat below too!

You can see some of the destruction of my car on the photos below. It was Trooper [REDACTED] who admitted to having access to my vehicles. He sent me an email stating this after I ended relations with him. The sole reason they want to track me today is to try and prevent me from sending the thousands of pages of corruption information I have on them, but they’ll never admit that.

Below was sent to the MSP Colonel and Govs. Baker and Sununu a few days ago but during 2018.

MSP Colonel,

October 1, 2018

Edited 10-2-2018

I’m once again writing about the crimes and harassment MA Trooper [REDACTED] and his MSP friends are instructing criminals and civilians to commit against me and my property. This document was also sent to you yesterday but I believe [REDACTED] is blocking my IP address so you may not have received it.

My IP information is below, I’m sure such an elite force can confirm whether he’s blocked your email from receiving mine OR perhaps the mere fact that over the years LE never received them indicates someone is blocking them? He’s even blocked me so the Governor’s office doesn’t receive my emails, but as easily as he can block, he can also unblock it to make it seem as he never did.

This group probably does this with anyone who complains about their activities!

[REDACTED]

His group continually trespasses both my home and vehicle to steal and destroy my property. I’ve already sent you the first photo showing how they ripped the rubber off the drivers side door of a BRAND NEW car I bought in June. (They’ve done plenty to the old one and past vehicles). The first photo is below.

They’ve placed that tracking substance throughout the vehicle, all over the seats and floors and on the interior roof. It has not only stained all of my vehicle but my clothing. You can see the big stain on the interior roof, well that stain is on the entire roof now.

After I scrub it for hours, the break in and do it again. The first photo is a large circle on the interior roof of my car and it’s now all over my seats and entire roof. Come to find out they have

a copy of the key to my vehicle which you can only obtain at a dealership. SO I have two options, continue paying years on a loan for a car MSP had their criminals destroy and have a copy of the key, or give the car back to the loan company which will ruin my credit.

Perhaps Trooper [REDACTED] should be made to pay my loan since he now has a key to my car and had his criminal informants destroy it. He can then keep the car since he has a key to it, as does many of his criminals and random people he sends to break in.

Some of the pictures are below. You will see a large circular stain on the first photo and this is on the entire roof now.

I cleaned my car out yesterday to find they've placed it on all of my paperwork, checkbooks, and important documents which I had to discard due to this.

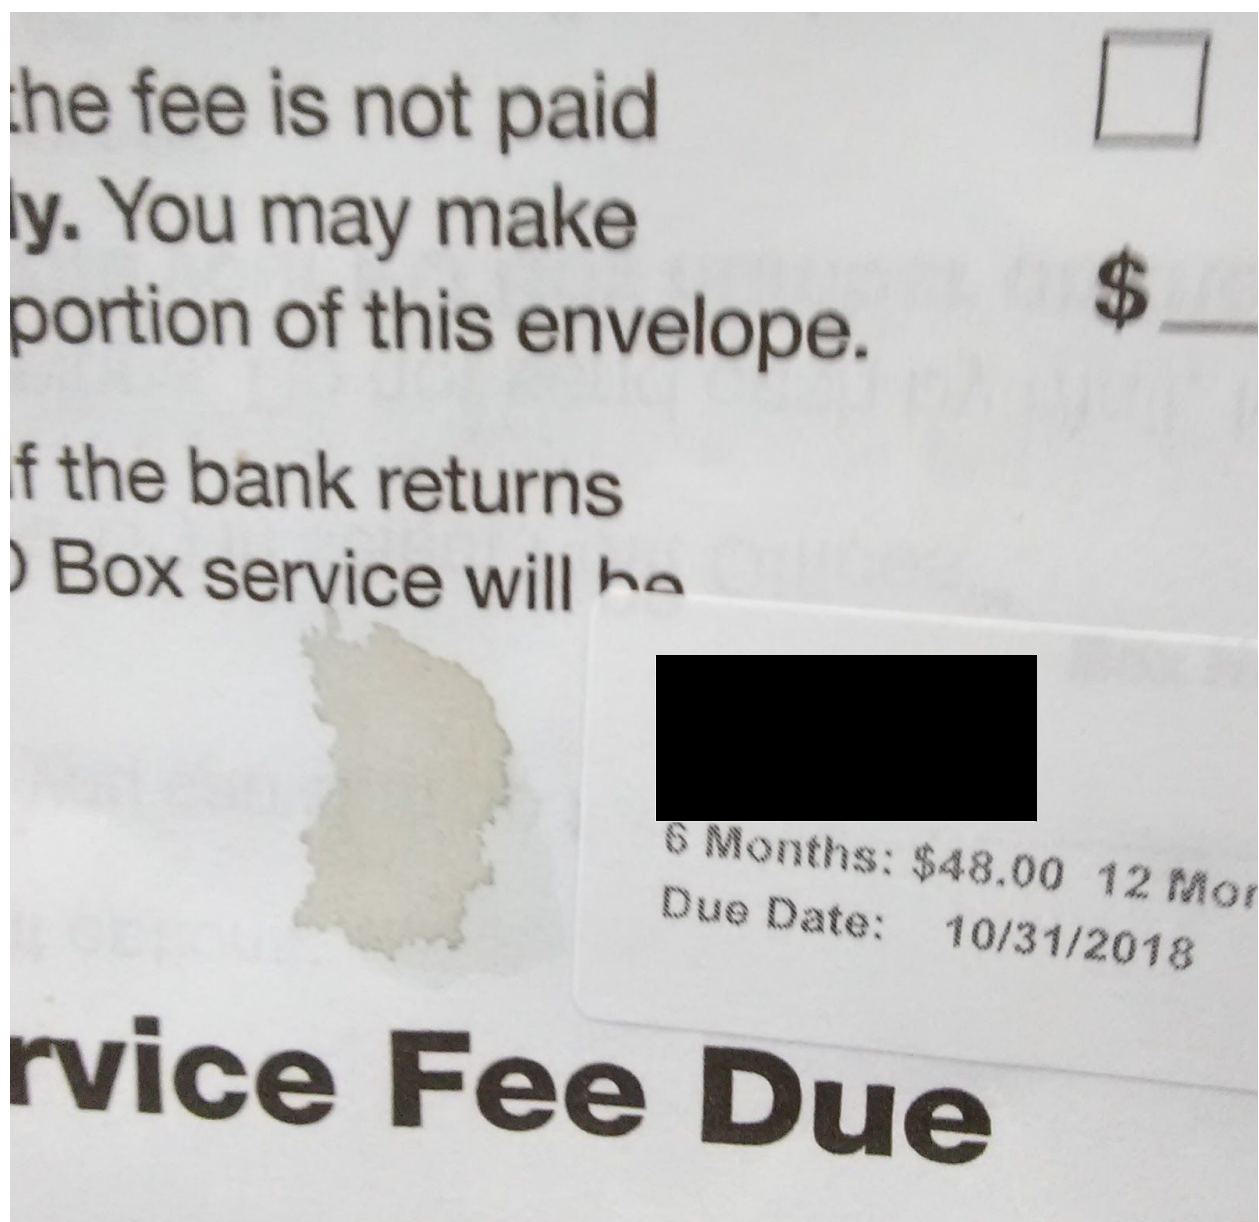

This is when I noticed they also tore a hole in the rubber to break in again. This time, they entered via the passenger rear side. The photo is below. Today I believe they are destroying the rubber intentionally and to make me believe they DON'T have a key, but they actually do. There have been too many occasions where they've entered my vehicle within three minutes of my leaving it and I just caught one of them last week at the rest area. He pointed a remote at my car to lock it up when I came out of the building and caught him. I also reported this to the Colonel.

I've told you many times they keep placing this tracking substance all of my clothing, even right after I wash them, and I told you they have people follow me to squirt it on the back of me when I'm at the store. They are having other civilians squirt this stuff on my jacket and clothing

when I am in a public place. They are able to do this by tracking my vehicle so they know where I am.

They've also had their friends at the US Post Office place it on the outer envelopes of the mail I receive at my PO Box in Hooksett. It's usually placed on half of the mail I receive. Below, you will see it's been placed on my check register, my pillow, and on several pages of a large book I own. You can see the large spot of this substance which was found on the corner of the back pages. Two pieces of my mail which was stained by a postal employee are below. The substance is just below the [REDACTED] [REDACTED] as well as a small spot to the left.

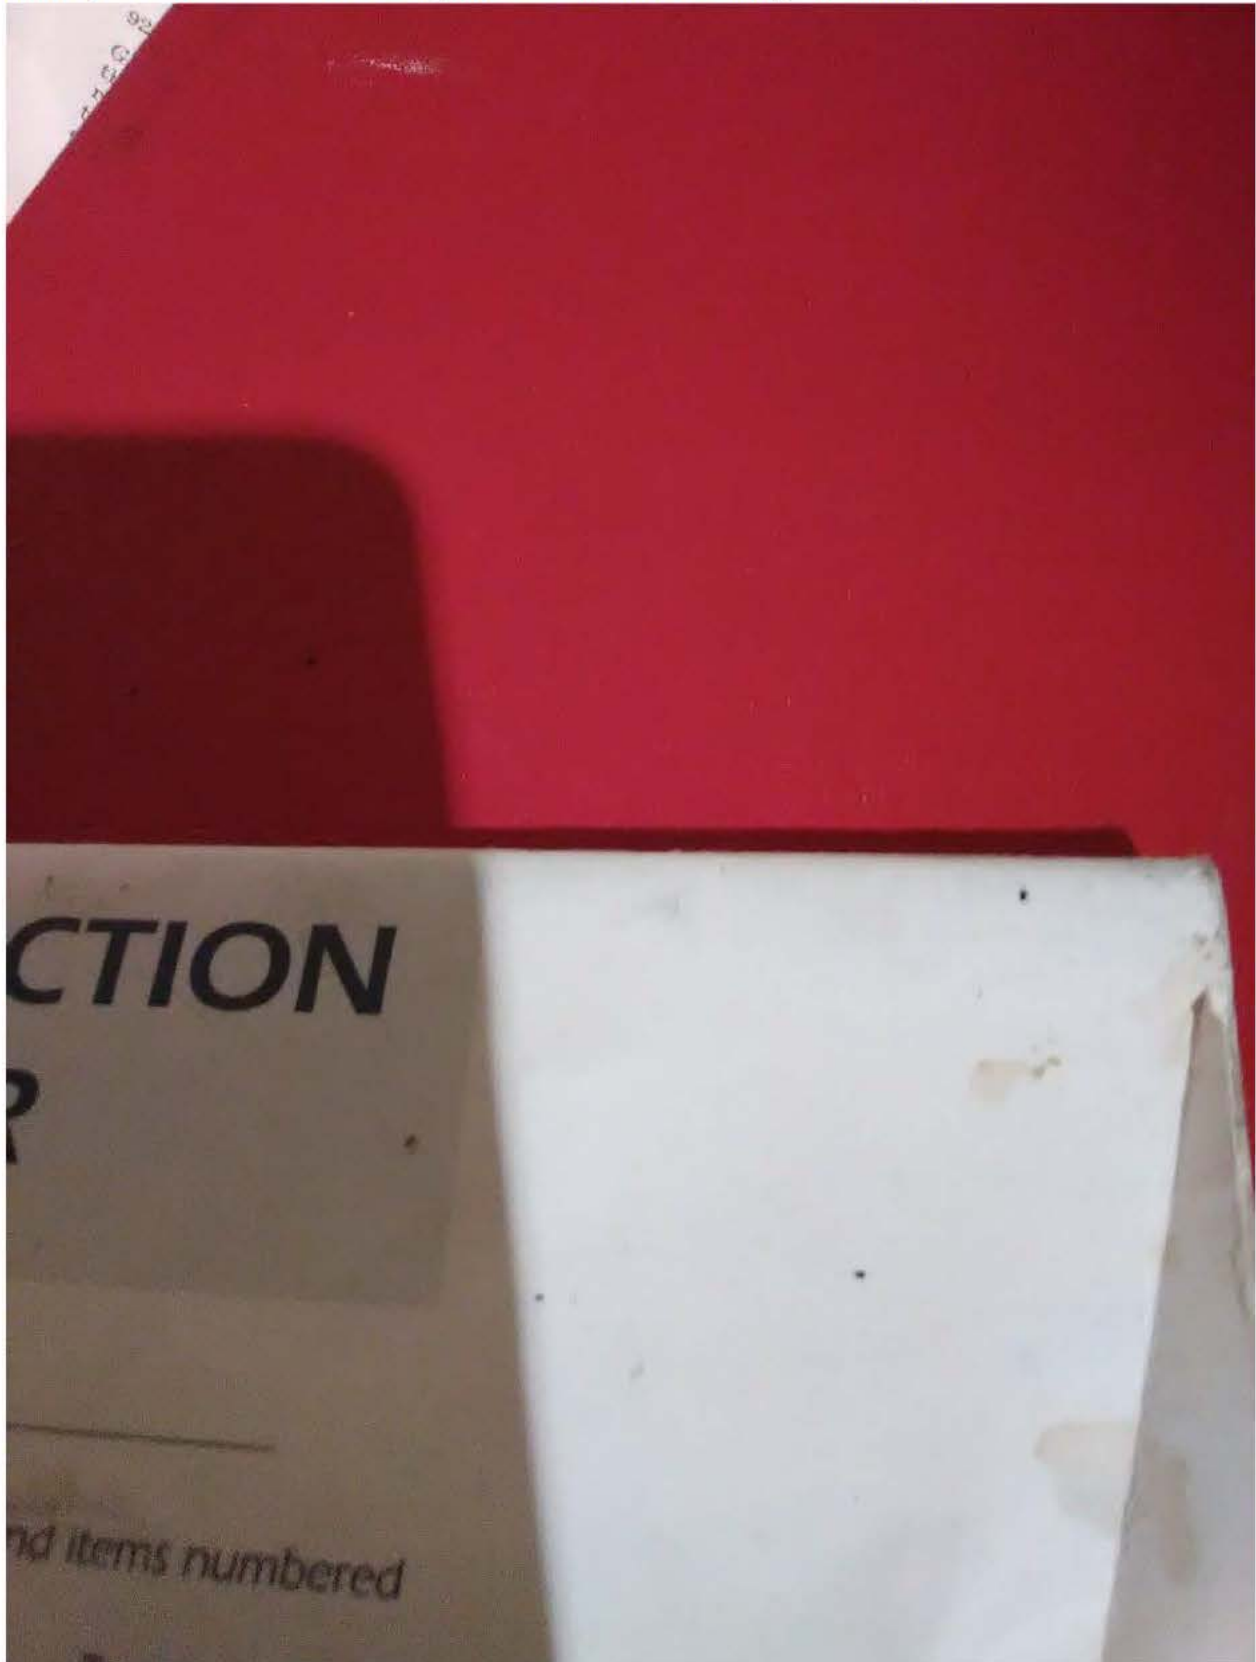

Below shows several photos of other objects of mine they placed this tracking gel on. They place it on important items such as my checks, check registers, books, photos of my child, personal items and anything they believe I will always carry with me.

They always place it on the hats I wear as well.

Below you can see several small gold dots on the front of my check register.

They've ruined all of my property, clothing and my new vehicle.

On the photo below you can see the goldish gel on the bottom left of a white towel I had just bought and never used. The gel was placed on eight different sections of the towel, most with tiny spots of it and placed on every towel and washcloth in my home. Once I wash my clothes and towels, they have a civilian or criminal trespass my home and place it right back on them. I've now moved out of my home due to their neverending trespasses and contamination of my personal property and vehicle.

The gel is shown on the insoles of my sneakers and my white sweatshirt. The sneakers were brand new so I had to throw them out! It was placed right behind my neck area on the sweatshirt and after I washed it off they did it again. I ended up throwing it out and I end up throwing out clothing every two weeks because of this. They had been placing it in my shampoo and conditioner for years, along with the liquids I use to color my hair and this is another way it enters my bloodstream.

Below shows the damage they did to my new car and have made many copies of the key. They stole a copy of the key out of my home to my last vehicle which they destroyed over the years. My income is maybe \$25,000.00 per year and my bills amount to \$22,000.00 which doesn't give me much spending money for gas, food, and clothing every month.

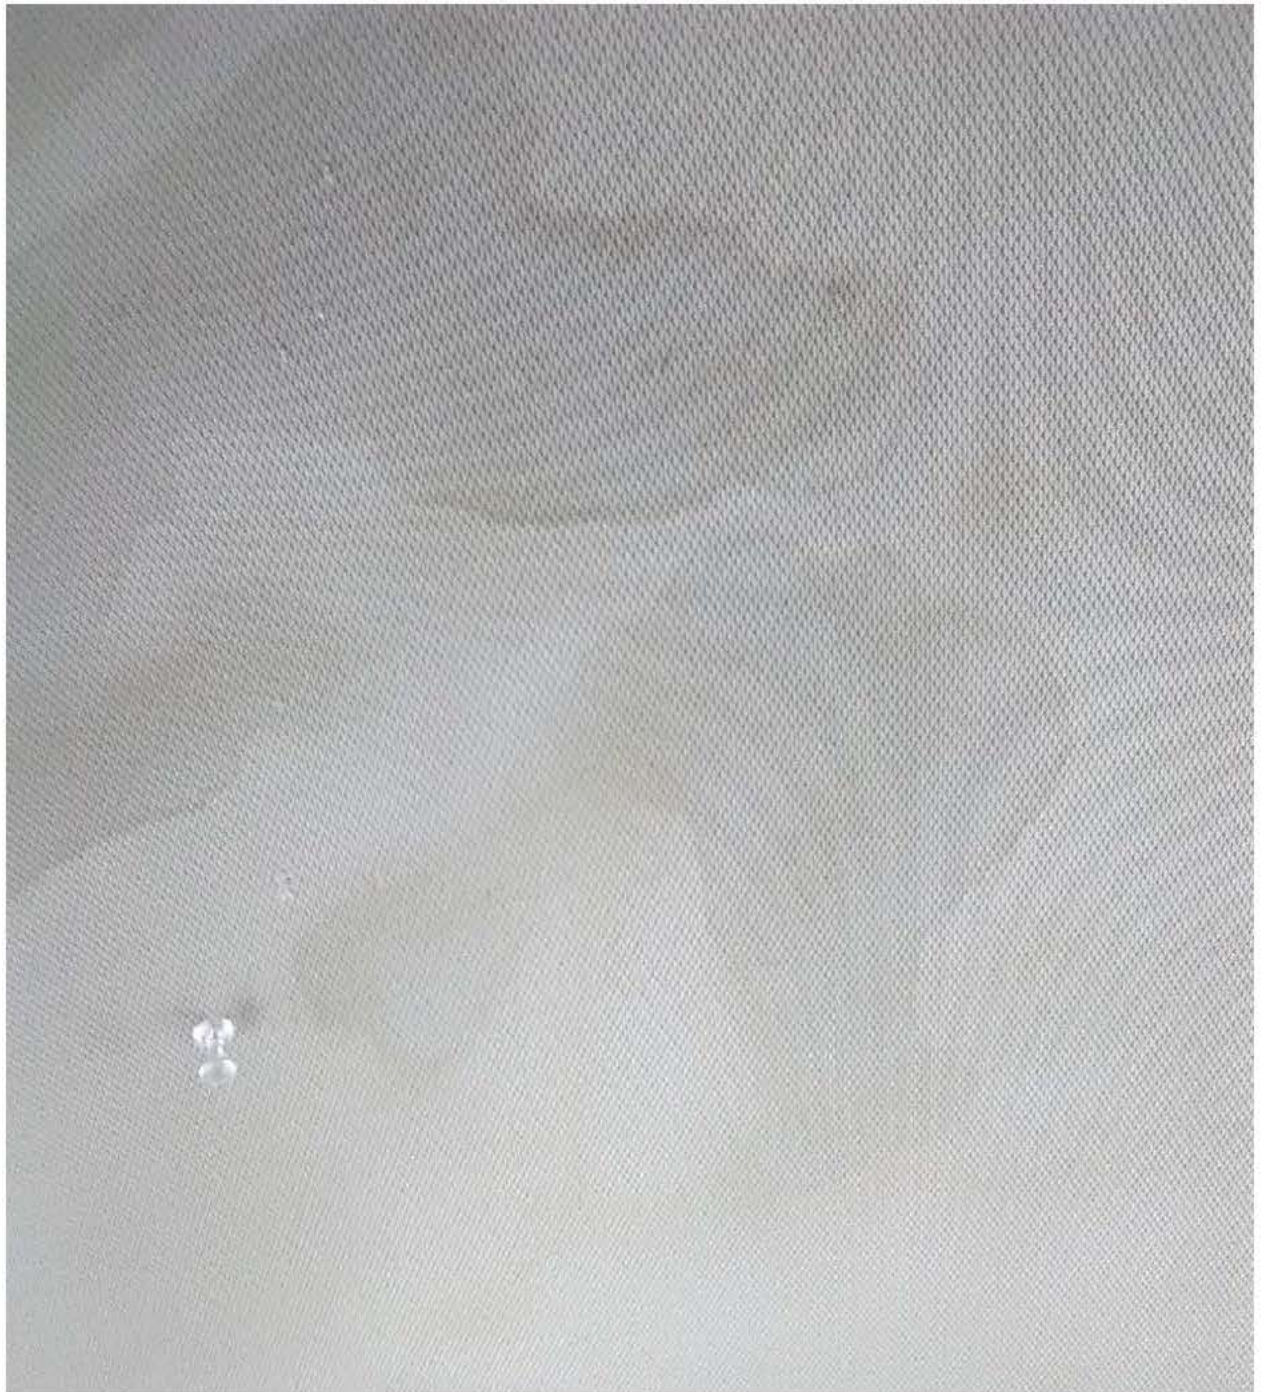

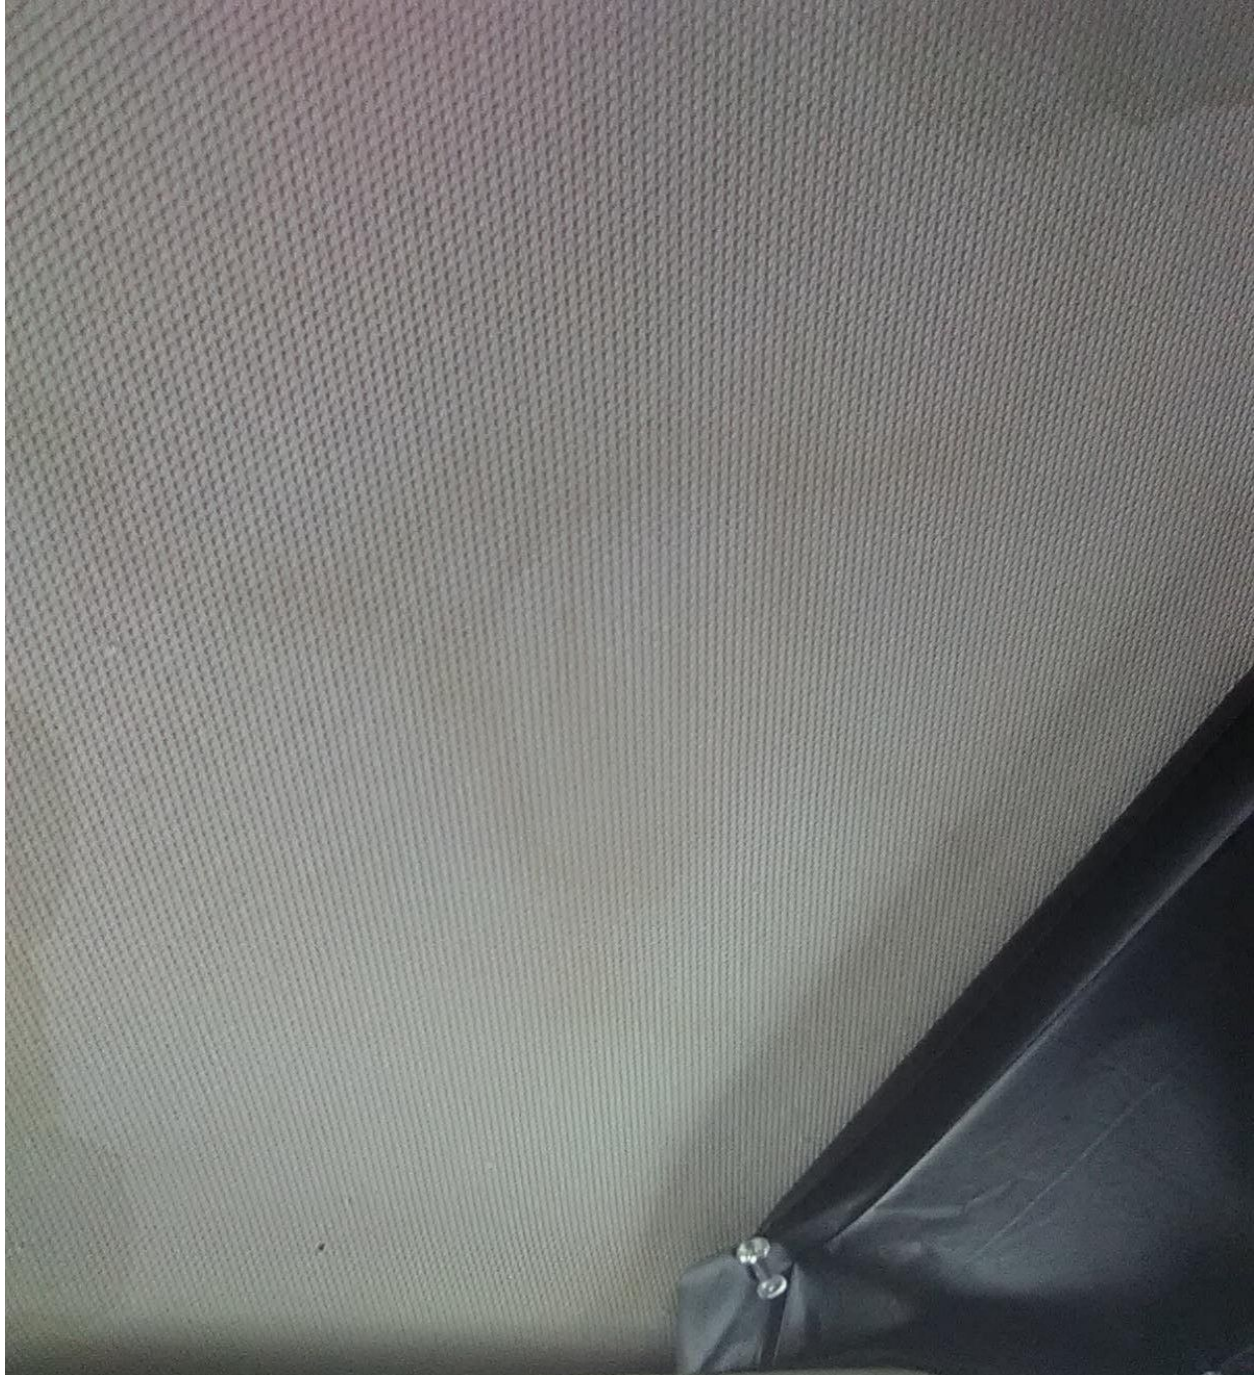

They've now done the same to the passenger side of my car and it was obviously done so I'd think they DON'T have a key to my new car, but now I know they do. The interior roof is now destroyed due to their spraying this tracking gel all over it. You can see the large gold-ish stains on the roof and then entire roof fabric is destroyed by this substance. More photos of my roof and clothing is below.

The only way they can stop my complaints and contacting MS. [REDACTED] [REDACTED] is by knowing where I am all the time. This is the true reason they do this. [REDACTED] is Trooper [REDACTED] [REDACTED] wife and they're afraid I will contact her about his cheating.

The below is my car roof and it's a little wet in the photo as I was trying to scrub it off again.

These police were also online discussing placing this fluid in the subjects hair and on the back neck area of their clothing. This is where they've placed it on my clothing numerous times. Part of their chat on this and discussing this tracking fluid is below. They also placed it in the water of water bottles I placed in my car even though I drank it. I didn't realize they did this until it was too late.

Below is their chat, a little of it, but these are the MA cops who are a part of and know what this substance is. They were discussing this during 2009, but have been tracking me long before that as my 18 year plus document showed. It was originally done for [REDACTED] who is a MA trooper and always stalked me.

thanks for replies.

excuse my scientific ignorance, but when you say 'isotopes' does this imply that whatever is attached to the money/clothing etc. is radioactive and emitting some kind of detectable 'signal' or would a satellite be emitting and looking for a 'response'. It just seems like a long way for a signal to travel from something small enough to be sprayed.

Below you can see what Ivy Cutler wrote about spraying it on the back of a subjects neck and this has been done to me over and over again. Ivy's Ebay account will follow so you can confirm a MA cop owns it. I know who owns them because I've collected millions of their accounts since they started harassing me.

He says "Dying of something incurable", so perhaps this is the poison they were instructing the criminal informant to place inside my home?

This chat is from the same 'Above Top Secret' site and is all the MA cops discussing the substance they are using.

'Now and Then' wrote the below and his Ebay is supplied below. He seems to know exactly what the substance is but noone will tell me!

Nope - not nanobots, it's radioactive.... a very specific type of radiation which sticks out like a sore thumb - can't remember exactly where I heard about it, but I have a feeling they use something very similar in larger quantities and they ariel spray it into weather systems and monitor the exact movements from satellites... I think they also do it with underground water sources.

That's my 2 euro cents.

edit: looks like Griffin got there before me! - I should read further down the threads

but if they spray from the air how do they track a specific object or person? Surely they need to spray a specific target with a unique 'whatever' and follow that, otherwise they'd be following squirrels all over the park.

This makes me wonder if maybe this could work in the opposite direction? How easy would it be to put particles on the ground in an area that a person would pick up walking through, and then check them later to know if they've been there? Would the particles stay on them for long? (I mean check them from up close, not satellite).

Suppose you can identify a location where terrorists are likely to go. Maybe you've found an IED and you know the optimal location from which an insurgent would likely position themselves to watch over it... or you know where a sniper has been positioning them self, or something like that. So you put some radioactive dust there while they're gone. When they come back into their village carrying that radioactive signature you know they're a terrorist and not a civilian.

Radioactive dust is also known as "contamination." It's not a good thing to breathe into your lungs. I don't think this is a particularly good idea from a public relations standpoint.

The chatters are Ivy Cutler, Now and Then, and Ice Blue. Below Ice Blue discusses putting it in the subjects hair. Their Ebay accounts are below.

icblue

Firstly, spraying something onto clothes is not very efficient, if you would like to keep track of someone on foot by satellite the obvious place to spray something is on the head hair.

I remember that years ago already there was a discussion about the use of light radioactive isotopes being sprayed on the backhead of then russian dissidents by the then KGB in order to locate and follow their movements.

When people started losing hair and showing other symptoms of radioactive contamination they dropped this method.

It IS possible that meanwhile the radioactive isotopes were replaced by something else, but you always have to use something that emits a signal in order to be picked up by a satellite or plane.

RFID chips do not emit (they have no power source) and would only be useful if you'd have stations on every corner to register the entry of the chip in the magnetic field of the station.

In the above chat you will see them refer to a couple of different substances used for tracking and I've found they have accounts under these same names, and even have an account under a laboratory who creates this stuff.

An explanation to radioactive ISOTOPES is below followed by the ISOTOPES Ebay which is owned by one of these cops.

radioactive isotopes tracking

Where are radioisotopes used? 

How are radioactive isotopes harmful? 

Some elements (and hence all their **isotopes**) are poisonous or chemically **dangerous**. Some elements are bio-active - they will be absorbed by the body, e.g. Strontium. If a **radioactive isotope** enters the body and is not excreted, any radiation (energetic particles) it emits can damage tissue and trigger cancer.

United States \$Negotiable Research facilities Job ref: 364

Requisition Id 364

Pay Band: Staff Member 3, Exempt
Relocation: Domestic and International relocation assistance is available for this position.

The Neutron Sciences Directorate (NScD) at Oak Ridge National Laboratory (ORNL) operates the High Flux Isotope Reactor (HFIR), the United States' highest flux reactor based neutron source, and the Spallation Neutron Source (SNS), the world's most intense pulsed accelerator based neutron source. Together these facilities operate 30 instruments for neutron scattering research, each year carrying out in excess of 1,000 experiments in the physical, chemical, materials, biological and medical sciences. HFIR also provides unique facilities for isotope production and neutron irradiation. To learn more about Neutron Sciences at ORNL go to: <http://neutrons.ornl.gov>.

SmartWater consists of a liquid containing a code, whose presence can be seen under ultraviolet light. It is intended to be applied to valuable items, so that if they are stolen and later recovered by police, their original owner can be determined after laboratory testing of a sample. Another application is a sprinkler system that sprays a burglar with the (invisible) fluid, which cannot be washed off and lasts for months, to generate evidence that connects a suspect to a specific location.

SmartWater comes in three variants, "Index Solutions", "Indsol Tracer" and "SmartWater Instant", which use different techniques to embed such a code. According to Phil Cleary, this allows "millions of chemical signatures" and is an identifier superior to genetic fingerprinting DNA.

This group of police work on the side with private investigators engaging in police misconducts and actions which are harmful to the citizens and the public. They have been doing this to me for many years which I've well proven but don't kid yourself to think I am the only civilian being poisoned with this chemical tracking fluid.

Trooper [REDACTED] has criminals spray this on me daily and it's been entering my bloodstream for a minimum of ten years and he continues doing so because MSP does not hold their criminal troopers accountable. Someone needs to investigate this harmful substance to put an end to the police causing severe health problems for the public and the obvious invasion of privacy of yearly tracking.

It's against the law for police to work in their official capacities for private investigators while working for a police force, and it's also against their own policy and procedures, but MSP appears to operate as a lawless police force by doing as they please and policing any state they choose. Trooper [REDACTED] makes his own rules and ignores the law with those in command unable to control him or enforce the law.

I really can't afford to keep buying clothing and shoes on a monthly basis due to their destroying my property over their obsession with me. These police need to find an alternate method of tracking because you have no right to destroy all of my property or my health in the process.

MSP has enough criminals within, I wonder if they're doing the same to their own troopers and tracking the over sixty troopers who have been arrested for committing crimes since 2010?

They continue stalking me and sending random men to park next to me in the middle of the night. Although I pay to live in a home, I must live in my car due to their never ending break-ins and crimes and I do so because I need to protect my property. I shouldn't have to worry about stepping outside of my home or vehicle due to his recruiting citizens to soil my clothing and car with this substance.

Colonel, If you can't control a road trooper you may be in the wrong position, or is the SPAM Union and DA Mike Morrissey protecting them?

A troopers duties are not to threaten, harass, and commit crimes. As I've said in a previous email, their scandals will continue becoming public until once and for all are held accountable and told they'll lose their jobs and pensions if caught breaking the law.

Until someone is made an example of the lawlessness will continue.

[REDACTED]
